

## **1993 FD3S Touring Trim Electrical FSM Index/Supplement**

### **Purpose:**

This is simply a searchable index of connectors that are found in the various 1993 FD3S wiring harnesses. Each entry shows the purpose of the connector, what harness it is located in, and what page(s) of the FSM reference it.

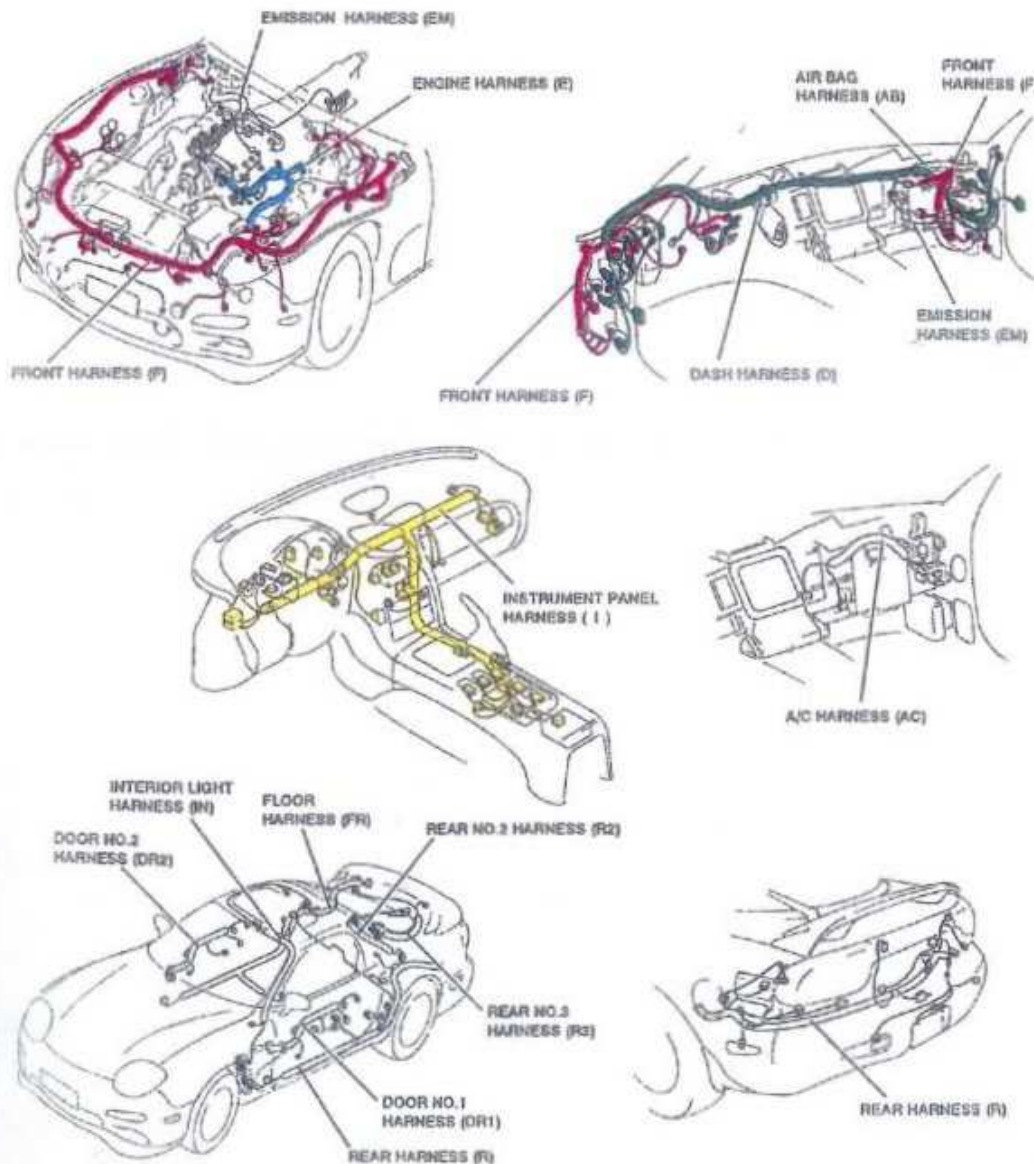

### **Scope:**

This index is customized for my 1993 FD3S RX7 with touring trim. It has a manual transmission, Bose sound system, cruise control, fog lights, and rear washer + wiper. If your RX7 has different options you will have to reference the full FSM for your particular needs.

The harnesses circled in blue are covered in this index:

## Harness symbols

DESCRIPTION OF HARNESS	COLOR	SYMBOL	DESCRIPTION OF HARNESS	SYMBOL
FRONT HARNESS		(F)	REAR HARNESS	(R)
ENGINE HARNESS		(E)	REAR NO.2 HARNESS	(R2)
DASH HARNESS		(D)	REAR NO.3 HARNESS	(R3)
INSTRUMENT PANEL HARNESS		(I)	FLOOR HARNESS	(FR)
EMISSION HARNESS		(EM)	DOOR NO.1 HARNESS	(DR1)
A/C HARNESS		(AC)	DOOR NO.2 HARNESS	(DR2)
INTERIOR LIGHT HARNESS		(IN)	AIR BAG HARNESS	(AB)

The emissions and engine harness are **not** covered in this index simply because I am swapping in a LS1 into my RX7 and don't actually have the harnesses to reference.

**Disclaimer:**

I am only human, so there are bound to be errors / oversights in my work. This is particularly possible in the page references to the connector. I created the page references by scanning through the FSM once. It is possible that I missed references. What this means for you is that if you are modifying a particular connectors and cannot account for every wire in the page references provided by me, then YOU must do the work and dig through the FSM to find where the other connectors are referenced to be safe.

**Misc. / Tips:**

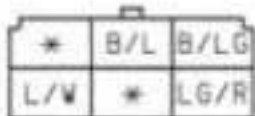

The list is in alphabetical order, but this PDF is also searchable, so using CTRL+F to use the search dialog will save you time.

### WIRING COLOR CODE
